

AIMS Representative to SBQ Report November 2022

Fellow AIMS Members,

It is my privilege to submit my Annual Report as the mining representative on the Surveyors Board of Queensland.

There have been three successful mining endorsements since our last AGM, Kahn Rosenberger (O), Anton Susukov (UC) and Ashley Tibbles (UM) and I would like to congratulate those surveyors.

Shortly we will be requesting that AIMS members complete a survey to gauge support for a change to the way in which SBQ assesses mine surveyor competency against the frameworks.

This would potentially be a process similar to the one now in place for cadastral endorsement candidates.

Outside of SBQ duties, I have been active in Destination Spatial where the focus is on promoting careers in surveying. Also, the Surveyor's Trust has been developing a surveying skills framework that I have had some input to from a mining context.

My position on the board as mining representative has been extended for another three years and I thank you for your continued support.

Ken Cross
AIMS SBQ Nominee
