Why travel to Perth to study when you can complete a Surveying (Mining and Engineering) qualification through work based training in the Goldfields and Pilbara?

Central TAFE and several large mining companies have joined forces to provide a work based training program (WBT) for surveyors .

The WBT program is so flexible that you can begin study at any time and at any level depending on prior experience and knowledge and you can complete the Diploma/Advanced Diploma surveying qualifications at your own pace while working in the industry.

The training model requires employer support to allow for regular release from the workplace.

A Central TAFE surveying lecturer provides you with specialised training, on site assessment and assists with the accreditation of prior learning (RPL) and each student has the opportunity for 'one on one' tuition.

Old and partially completed qualifications can be mapped across to the new Advanced Diploma program to ensure that you are able to meet the academic requirements for Mine Surveyor authorisation.
