Graduate & Vacation Positions – Mine Surveyor

Coal, Copper and Zinc Commodities

NSW, QLD and NT

At Glencore you will work with leaders in your field every day. You will be a part of a global company who want you to succeed, not just for the benefit of the organization but also so you can achieve your own career goals. Our people are committed to working ways that embrace our values of Safety, Entrepreneurialism, Simplicity, Responsibility, and Openness.

Glencore have a number of opportunities opening up to university students to join our Mine Surveyor Graduate Program (for those graduating this year) or our summer Vacation Program for those students still studying.

As a **Graduate** you will be exposed current mine surveying techniques and equipment, and take part in the critical aspects of mining provided by the Survey Departments. Dependant on the site, there are a great number of additional financial benefits, and if residential, we will pay for your relocation.

Those students still studying will gain similar exposure during their **Vacation Program** and will contribute to critical operational business improvement projects. For those that are going to site, we will pay for flights and accommodation during your placement.

See the next page for more specific site information on the work you could be doing. Regardless of the site or commodity, Glencore provides unrivalled career and development prospects, great communities and the opportunity to work with leaders in your field.

Applications will only be accepted via: www.glencore.com/careers.

Graduate Applications Close: 31st March 2019

Vacation Student Applications Open: 15th April 2019

Commodity Information – Mine Surveyor

Specific Role Information

As a Mine Surveyor at Glencore, you will be involved be working alongside experienced and versatile survey teams. You will be exposed to some world-class technologies and you will provide directional control for development mining, other set-outs and production drill mark-ups, install and maintain the mine survey control network, undertake void surveys using Optech / CALS survey equipment and measure / calculate mine volumes for surface stockpiles and underground voids. Under the guidance of our experienced and skilful surveying team, you will contribute to set out blasting patterns and give direction to the mining operation to ensure that all development and mining is executed according to a specific mine design. No two days are the same, and if you are looking for a challenging but rewarding career as a surveyor, then this is the right opportunity for you.

Coal – Queensland and New South Wales

What distinguishes us from other programs is the acceleration of your skills development. We believe that rotation through a variety of teams, mining methods and locations, we can enhance your professional and practical development on a fast track towards achievement of your career goals. To support you in this growth, you will have access to our Senior Leadership team from Day 1! All of our graduates are engaged in a structured leadership development program, you have access to a mentor and a series of professional development workshops culminating in an Australia wide national conference with your peers and our business leaders.

Copper & Zinc – North Queensland

As a Surveying Graduate with Glencore North Queensland, you will work in one of the world's most iconic mining districts, which has pioneered several Mining innovations whilst producing some of the current Local and Global Mining and Resource leaders. Our industry-leading and experienced professionals will challenge you each step of the way – to think differently, ask questions and come up with creative solutions. As a Glencore graduate, you'll have access to unrivalled opportunities and unlimited potential to grow your career. This is your opportunity to test your skills and creativity in real situations, working with some of the best in your field.
