

Statutory Mine Surveyor

About Delta Coal

Delta Coal owns and operates the Chain Valley and Mannering Collieries at the southern end of Lake Macquarie, NSW. Both mines are approximately 60km south of Newcastle. Currently all coal produced is delivered directly to Vales Point Power Station.

Delta Coal operations are based on a consistent, competitive and safe manner of coal production and respects its employees, community and the environment. Delta Coal has recently transitioned to the Herringbone Mining System (a bord and pillar method).

The Role

A full-time opportunity has become available for a suitably qualified and experienced registered Mine Surveyor at Delta Coal. Reporting to the Technical Services Manager, the purpose of this role is to deliver and certify statutory mine plans as well as providing professional survey services and support to the operation by applying in-depth knowledge of mine surveying techniques. The responsibilities of the Mine Surveyor will include leading and supervising the survey team.

Requirements

To be the successful candidate you are required to meet the following criteria:

-) Tertiary qualifications in Surveying or equivalent industry experience;
-) NSW Registered Mine Surveyor;
-) Be committed to a positive safety culture;
-) Have a good knowledge of all applicable legislative and compliance requirements within your area of responsibility within underground coal mining;
-) Technical proficiency in mine surveying systems and software;
-) Proficient in the Microsoft Office suite;
-) A preference would be given to candidates with a minimum of 2 years underground coal experience in a similar role.

APPLICATIONS

Please submit your applications to omain@deltacoal.com.au on before the closing date of is 21 January 2022.
